

PFI (Private Financial Initiative) of Communication Systems: Comparison between Army Maintenance Vs. Industry Maintenance

Capt. Ilya Levin

*IDF, Ground Forces,
Technology Division, Israel
E-mail: ilyalev12@yahoo.com*

Key words: communication systems, maintenance, LCC, availability

The work deals with the dilemma of maintaining the current situation – army maintenance of communication systems, or switching to industry maintenance.

First we will introduce the systems and the alternatives of army maintenance and industry maintenance.

Each alternative is analyzed and the alternatives are compared: the availability achieved in each alternative and the cost of each alternative. As part of the analysis LCC and Manpower analysis are performed.

Then we compare the benefits of each alternative and the risks in each.

Finally a final recommendation is introduced.
